

New multifunction tacker

Rapid has now launched an enhanced version of the MS4.1 multifunction tacker. The new manual tacker combines four functions in just the one tool. It features a shockproof casing, ergonomic design and durable, all-steel wear parts. It is also

recoilless for working comfort. The universal magazine can handle 6-14 mm fine wire staples, 12-14 mm cable staples, 15 mm brads and 15 mm headless pins.

Cleaning made easier

Kärcher's new WV 50 cordless window vac is available in a set complete with a micro-fibre glass cleaner attached to a spray bottle, and a concentrated cleaning agent. The 770 g window vac is powered by a lithium-ion storage battery. Running time when fully charged amounts to around 20 minutes. In practice this is

enough to clean an area of about 25 m² - 30 m², or 10 - 15 windows. The dirty water tank can be quickly and easily emptied between times.

New products in London

Everbuild Building Products will be exhibiting its wide range of sealants, adhesives, fillers and building chemicals at the Totally DIY Show in London this

January. Also featured on the stand will be products from the company's two recent acquisitions: Purimachos and Kwik-grip. The Purimachos range includes a wide choice of fire cements, mortars and heat-proof products. The Kwikgrip range consists of an extensive variety of tapes and metal flooring and worktop trims.

Now with ptfе

The penetrating lubrication and maintenance spray GT 85 now contains ptfе, which func-

tions as a long lasting coating. Having been given a protective spray of GT 85 before use, tools, garden machinery or bikes can be cleaned simply and easily afterwards. There is no build-up of any deposit on the sprayed surfaces, since the spray is not oil-based. This product, which has been used in the cycle trade and industry for more than 25 years, is now available to the DIY retail trade as well. www.gt85.com

Safety and convenience

Krause is launching its 'Tele-Board' system, an extending aluminium scaffolding board that can be made into a height-adjustable work platform system with the addition of appropriate accessories. The manufacturer claims that the complete system can be moved in next to no time and offers considerably more possibilities for use than traditional versions. The package includes two 'NonSlip' pads to prevent the board from slipping and

causing any damage to the bearing surfaces.
